authentic and that captures the realism and authenticity of the sport." "It's what the players do on the field that we want to capture as best as possible," he added. FIFA features a network of nearly one million licensed footballers from around the world, and uses in-depth data analysis to power the most accurate, data-driven football simulation to date. The new engine also features new presentation details and lighting, enhanced player models with authentic physical characteristics and wear, as well as state-of-the-art on-field broadcast graphics.
